1. The indicated allowability of claims 3-12 is withdrawn in view of the newly established restriction requirement. The restriction requirement is as follow.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2 and 10, drawn to a system for allocating bandwidth based on class of service, classified in class 370, subclass 395.43.
 - II. Claims 3-8 and 11, drawn to a communication module/chassis, classified in class 370, subclass 463.
 - III. Claims 9 and 12, drawn to a data flow control mechanism in a switching system, classified in class 370, subclass 235.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of inventions II and III has separate utility such as a communication module/chassis and a data flow controlling device. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
